SOV/78-3-7-40/44

TITLE: The Extraction of Some Rare Earths by Tributyl Phosphates  
(Ekstraktsiya nekotorykh zemkozemelnykh elementov  
tributylfosfatom)

PERIODICAL: Zhurnal neorganicheskoy khimii, 1958, Vol. 3, Nr 7, pp 1703-1708  
(USSR)

ABSTRACT: Investigations were carried out for the separation of rare earths from larger quantities of uranium, iron, aluminum, magnesium, and calcium by extraction by means of tributyl phosphate. In the present paper the optimum conditions for the separation of small quantities of rare earths by extraction are worked out. A more rapid method for the separation of small quantities of promethium by other elements contained in uranium ores is described. It was found that the presence of uranium in the solution investigated reduces the coefficient of the distribution of rare earths between the tributylphosphate phase and the aqueous phase considerably. It was further found necessary first to separate uranium by ether extraction from the rare earths and then to extract the rare earths by means of tributylphosphate. The extraction of yttrium by

Card 1/2

The Extraction of Some Rare Earths by Tributyl Phosphates SOV/78-3-7-40/44

tributylphosphate was also investigated. The extraction of promethium and other rare earths from accompanying elements by means of tributyl phosphate shows that the increase of nitric acid concentration increases the extraction of rare earths by tributyl phosphate. There are 4 figures, 3 tables and 3 references, 1 of which is Soviet.

AUTHOR: Jeřábek, Václav, Engineer

TITLE: Housing Units at the Exhibition "Czechoslovakia 1960"

PERIODICAL: Nová Technika, 1960, No. 5, pp. 227 - 228

TEXT: The author deals with the industrialization of housing construction and describes so-called housing units, developed by the team of Candidate of Technical Sciences Engineer Novák from the Výzkumný ústav stavební výroby (Research Institute of Constructional Engineering Products) in Prague and produced by the n.p. Kovona (Kovona, People's Enterprise) in Karviná near Ostrava. A description of the units follows, which consist of a complete kitchen equipment, a bath room and a water closet, the center of which is a so-called installation bloc containing gas pipes, cold and warm water pipes etc. The installation bloc has a structural steel frame and a size of 50 x 30 cm and a height of 2,67 m. The dividing wall between kitchen, bath room and water closet is supplied by the Sfinx Enterprise at Frýdlant, "Umacart D" cover panels are used. A description of the bath room follows, it has a size of 150 x 133 cm. The airing of kitchen and water closet is carried out by means of a ventilator. The unit has a total surface of 245 x 135 cm. It can be installed in TO 2B, TO 3B, G 57 and G 58 type buildings and in cast

TITLE: Reciprocating valveless engine with dual piston motion. CZ Pat.  
No. PV 653I-64

SOURCE: Vynalezky, no. 10, 1965, 21

TOPIC TAGS: engine crankshaft, engine piston, engine cylinder

ABSTRACT: An Author Certificate has been issued for a four-cycle valveless reciprocating engine with a dual, i.e., reciprocating and rotary, motion of the working piston. The motion of the piston controls the injection exhaust ports in the working cylinder. The dual motion is accomplished by specially designed crankshaft bearings housed in the lower section of the working cylinder. The reciprocating piston engages the crankshaft through the connecting rod, while the crankshaft's bevel gear meshes with another bevel gear fastened to the stationary bottom

Card 1/2

L 38500-66

ACC NR: AP6006162

of the working cylinder. The rotary motion is transmitted to a fly-wheel pivoted on the cylinder's bottom, as well as on the piston. The flywheel's rotation axis is synchronized with that of the working cylinder. [KP]

TITLE: Symposium of representatives of socialist countries on the question of  
eliminating endemic tuberculosis

SOURCE: Medicinski glasnik, no. 6-7, 1965, 165-166

TOPIC TAGS: tuberculosis, therapeutics, medical conference

ABSTRACT: Detailed report on this 3-day meeting in Varna, Bulgaria in  
October 1964 with participation of Hungary, East Germany, Poland, Rumania,  
Soviet Union, Czechoslovakia, Bulgaria, and Yugoslavia. Five large sessions  
were held with an unspecified number of papers or registrants; however a  
number of names of prominent tuberculosis specialists and official personalities  
are given with very brief abstracts of talks on various diagnostic and  
therapeutic aspects of tuberculosis in eastern Europe. [JPRS]

"Protecting Workers from Radiation Sources in Uranium Mines and in  
 Work with Radioactive Materials."

Belgrade, Higijena, Vol 14, No 2-3-4, 1962; pp 154-168.

Abstract: Presentation and discussion of data accumulated during the 4  
 years' activity of the Department for Protection from Radiation  
 (oddeljenje za radiolosku zastitu) of the Institute of Occupational  
 medicine of the Peoples' Republic of Serbia (NZ/Narodna Republika/  
 Srbije.) Methods for monitoring exposure, radioactive levels in water,  
 air, dust under and above-ground (from mines Kalna, Gabrovica, Gorenja  
 Asa); hemograms of 14 miners and 142 workers (95 men) in uranium  
 technology; discussion of main problems and dangers, remedies advocated  
 planned or in effect. Five tables, 2 photographs, 5 charts-diagrams;  
 13 Western and 4 Yugoslav references.

JEREMIC, Mihajlo, inz., nauci saradnik (Sarajevo, Skenderija 27/III)

Exploring the small ore deposits in relation to their future opening and development. Tehnika Jug:Suppl.:Rudarstvo metalurg 14 no.1:65-75 Ja '63.

1. Institut za rudarstvo, Sarajevo.

JEREMIC, Mihajlo, dr inz.; MORAVEK, Jovan, dipl. inz.

Salt deposits of northern Bosnia, and their economic value.  
Rudar glasnik 2:71-78 '64.

1. Faculty of Mining and Geology, Tuzla (for Jeremic).
2. Director, Federal Training Center for Instructors in Mining, Tuzla (for Moravek).

JEREMIC, Mihajlo, dr inz., prof. (Sarajevo, Skenderija 27/III);  
MORAVEK, Jovan, inz.

Mining methods for exploitation of natural salt deposits in  
Poland. Tehnika Jug 19 no. 2:Suppl.:Rudarstvo metalurg 15  
no. 2:264-274 F '64.

1. Faculty of Mining of the University of Sarajevo, Tuzla (for  
Jeremic). 2. Federal Training Center for Instructors in Mining,  
Tuzla (for Moravek).

JEREMIC, Mihajlo, prof. dr inz. (Tuzla)

Appearance of valuable mineral raw materials in the  
salt-bearing formations in Poland. Pt. 1. Tehnika Jug 19  
no.3:Suppl:472-478 Mr '64.

1. Faculty of Mining of the University of Sarajevo, Tuzla.

JEREMIC, Mihajlo, dr inz., prof. (Tuzla, Iroeva 63)

Hydrochemical characteristics of salt bearing basins  
in northeastern Bosnia. Tehnika Jug 19 no.5:Suppl:  
Rudarstvo geol metalurg 15 no.5:851-856 My '64.

1. Faculty of Mining of the University of Sarajevo, Tuzla.

JEREMIC, M.; VOJINOVIC, Lj.; SPASOJEVIC, M.

Hydrophysical properties and their relation in the profile of  
smonitza and parapodzols of Serbia. Zamljiste biljka 12 no.1/3;  
157-166 Ja-D '63.
